Notes:

All Rates are based on # of occurrences per MM Vehicle Revenue Miles

Definitions per National Transit Database:

Major Events: A safety or security event occurring on transit right-of-way or infrastructure, at a transit revenue facility, at a transit maintenance facility or rail yard, during a transit related maintenance activity or involving a transit revenue vehicle that results in one or more of the following conditions: Non-Rail Modes: A fatality confirmed within 30 days of the event; An injury requiring immediate medical attention away from the scene for one or more person; Property damage equal to or exceeding \$25,000; Collisions involving transit revenue vehicles that require towing away from the scene for a transit roadway vehicle or other non-transit roadway vehicle; An evacuation for life safety reasons. Rail Modes: A fatality confirmed within 30 days of the event; Serious injury that may or may not require transport from the scene for medical attention (see Serious Injury); An injury requiring immediate medical attention away from the scene for one or more persons; Substantial damage; An evacuation for life safety reasons, or to the rail right-of-way; Rail transit vehicle collisions occurring at a grade crossing; Rail transit vehicle collisions with an individual on the rail right-of-way; Rail transit vehicle collisions with another revenue or non-revenue rail transit vehicle; A mainline or yard derailment of revenue or non-revenue vehicles; Events involving a runaway train.

Injury: Any damage or harm to persons as a result of an event that requires immediate medical attention away from the scene.

Assault on Transit Worker: A circumstance in which an individual knowingly, without lawful authority or permission, and with intent to endanger the safety of any individual, or with a reckless disregard for the safety of human life, interferes with, disables, or incapacitates a transit worker while the transit worker is performing the duties of the transit worker.

System Reliability (Major Mechanical System Failure): A failure of some mechanical element of the revenue vehicle that prevents the vehicle from completing a scheduled revenue trip or from starting the next scheduled revenue trip because actual movement is limited or because of safety concerns.
